SUMMARY A full stack developer experienced in building web applications from scratch across multiple programming languages. 5+ years of expertise in law. Passionate problem solver eager to leverage strong written, presentation, and client facing skills and burgeoning coding skills to impact technical teams.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS. **Framework/Libraries:** NodeJS, Express, React, jQuery, Mongoose. **Databases:** MongoDB, SQLite. **Version Control Systems:** Git, GitHub. **Deployment:** Amazon AWS EC

TECHNICAL PROJECTS

<studyBuddy/> | Github
Pomodoro Study timer with Spotify embedding for personal music choice and ambiance.
- Built full scale application end-to-end using Javascript React, Bootstrap CSS framework, and Spotify WebAPI in a group setting.
- Implemented Spotify OAuth requirements for access to personal and public Spotify playlist selection. Optimized search bar functionality to not overload page loading.
- Utilized Github for group collaboration and managing push and pull requests accordingly.
- Cohesively completed and continually enhanced project within an accelerated time frame.

Jessica Keenan Personal Website - Live Site **|** Github
A personal branding website for a pediatric speech-language pathologist to highlight therapy content and a soon-to-be author of a children's book series.
- Built website end-to-end using Javascript React and Bulma CSS framework while utilizing FontAwesome's Icon library, embedded external links to various web pages, and utilized a Mongo database for capturing reviews and comments (functional, but to be deployed at a later date).
- Deployed website via Amazon AWS EC2.

PROFESSIONAL EXPERIENCE

UNITE HERE HEALTH – **Senior Paralegal** (Paralegal II, 2013 – 2019)   **1. 2013 to 9. 2020**
- Led optimization of contract database and closely worked with in-house developers to implement time saving features and enhance contract reporting.
- Created documentation for training of employees on technical aspects of contract database and was the first line of troubleshooting.
- Created and revised procedures for manually tracking and updating various information from contracts in effort to reduce time of review completion by paralegals.
- Reviewed contracts for compliance with Fund Minimum Standards and ERISA requirements in order to avoid legal penalties being assessed to the Fund.
- Complete contract reviews and communicated with other departments in a collaborative manner to ensure accurate implementation of contract terms and conditions by all responsible parties.

BONE COLLECTOR, LLC – *Paralegal & Inventory/Online Store Manager*   **8. 2010 – 12. 2012**
- Implemented Microsoft Access Database for License, Endorsement, and Television Agreements and continually updated new terms and information. Ran reports periodically to ensure all terms were being fulfilled in a timely manner.
- Used the GS1 system to generate UPC barcodes for all new products and coordinate use of labels. Allowed the company to ship products to bigger retail stores across the country.

EDUCATION

CODING DOJO – Full-Stack Developer Certificate - MERN Full-Stack **(**2021)
CHICAGO STATE UNIVERSITY– Paralegal Studies (2011)
NORTHERN ILLINOIS UNIVERSITY – B.S. Political Science with an emphasis in Public Law (2010)
